PARISH® is a suspension concentrate (SC) formulation containing 320 g / l phenmedipham, which belongs to the bis-carbamate class of herbicides. PARISH is a contact, post-emergence herbicide for the control of certain annual broad-leaved weeds in winter oilseed rape.

Maximum individual application rate: Winter oilseed rape: 1.1 L product/ ha

Maximum total dose: Winter oilseed rape – 1.1 L product/ ha

<table>
<thead>
<tr>
<th>Section</th>
<th>Profile</th>
</tr>
</thead>
</table>
| 1. WILDLIFE | PARISH is not classified as ’Harmful to game, wild birds and animals.’  
Mammals and Birds | PARISH is of low toxicity to mammals and phenmedipham, the active substance in PARISH, shows moderate toxicity to birds.  
When used according to the label, no risk management is necessary to protect wild mammals and birds. |
| 2. BEES | No risk management is necessary and there is no requirement to avoid application of the product when bees may be foraging on flowering weeds. |
| 3. NON TARGET INSECTS AND OTHER ARTHROPODS | No risk management is necessary. PARISH poses a low risk to a range of arthropod species commonly found in and around treated fields. |
| 4. AQUATIC LIFE | PARISH is classified as “VERY TOXIC TO AQUATIC LIFE WITH LONG LASTING EFFECTS”.  
PARISH shows extremely high toxicity to certain aquatic organisms (algae), with moderate toxicity to fish and Daphnia. Care must be taken to ensure that surface waters or ditches are not contaminated with the product or the used container.  
No risk management necessary. When PARISH is used according to the label instructions there will not be sufficient contamination of the water to present a risk to aquatic life. |
| 5. SOIL and GROUND-WATER | The active substance in PARISH phenmedipham shows moderate persistence and low mobility in soil. When used according to the recommendations on the label, PARISH poses a low risk of groundwater contamination.  
Earthworms | PARISH shows moderate toxicity to earthworms. However, at the recommended application rate, the risk to earthworms is low and no risk management is necessary. |
<table>
<thead>
<tr>
<th>Soil microorganisms</th>
<th>PARISH is unlikely to have any long-term effect on soil microbial activity. The risk is therefore considered to be low and no risk management is necessary.</th>
</tr>
</thead>
<tbody>
<tr>
<td>6. NON-TARGET PLANTS</td>
<td>PARISH is an herbicide and therefore care should be taken to minimise drift of the product to wild plants.</td>
</tr>
</tbody>
</table>

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE. FOR FURTHER PRODUCT INFORMATION, INCLUDING WARNING PHRASES AND SYMBOLS, REFER TO THE ADAMA AGRICULTURAL SOLUTIONS UK LTD WEBSITE (WWW.ADAMA.COM).

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
