Kantor	Slither	

3-Way Mixes

ADAMA Agricultural Solutions UK Ltd will support physical compatibility of three-way mixes of Phoenix plus any one product from any of the listed fungicides, herbicides, insecticides or PGR's listed above.

~ Maintain constant agitation

Add Nebula to tank 1st.

Incompatible mixes

Epsa Top (Bittersalz), Yara Phosyn Magphos K are not compatible when mixed with Phoenix in a tank mix of 3 or more products. Other incompatible 3 way mixes include Phoenix + Master Magnesium + Trace Elements and Phoenix + Cyclade + Acanto Prima.

*Note: Do not tank mix Mavrik or Klartan with Boron.

When using tank mixes always follow the statutory conditions of all tank mix partners. Physical compatibility tests check that the products will mix and are suitable for application through a conventional sprayer and may not be approved tank mixes. These tests do not check for any adverse crop effects or the biological efficacy of the individual products when applied in a tank mix. ADAMA Agricultural Solutions UK Ltd gives no warranty and accepts no liability in respect of physical compatibilities and use is at growers own risk.

Phoenix[®] contains 500 g/l (39.5% w/w) folpet. Use plant protection products safely. Always read the label and product information before use. For further product information, including warning phrases and symbols, refer to www.adama.com/uk/en or call The Technical Helpline on 01635 876 622. All other non ADAMA Agricultural Solutions UK Ltd brand names used in this tank mix list are trademarks of other manufacturers in which propriety rights may exist.
