

CropVIEW®

CropVIEW® is an agricultural information system, with an advanced camera that receives inputs from sensors on the ground and in the soil. This information enables farmers to ensure continuous crop quality and yield control, where the benefits include disease prevention, crop protection efficiency, greater accuracy in the evaluation of the crop environment, and improved yield control.

CropVIEW®是一个农业信息系统，该系统设有高科技照相机，能够接收来自地表和地下传感器的信号。有了这些信息，农民能够不间断地管控作物质量和产量。该系统给农民带来诸多益处，包括提高疾病预防能力和植保产品的效率，更精确地评估作物环境和更有效地控制作物产量等。
