| Advisor/Grower (For full details see other form): | |
|---|----------------------|
| Adama contact: | Crop: |
| 10-14 days after application: | |
| Date: | Crop effects: |
| Weeds present: | Non-target effects*: |
| 42 days after application: | |
| Date: | Crop effects: |
| Weeds present: | Non-target effects*: |
| 3-4 months after application: | |
| Date: | Crop effects: |
| Weeds present: | Non-target effects*: |
| Subsequent crop: | |
| Date: | Crop effects: |
| Weeds present: | Non-target effects*: |
| | |

*Non target effects includes effects on hedgerows, adjacent crops, weeds, trees etc. - be specific regarding affected and non affected species, record all effects and record level of effect, take photo's if possible. NB - Measure the nearest distance from the treated crop to the surrounding species that are effected.

PTO

Clomazone Monitoring Form

To be filled in by Adama Technical Support.

Field and surrounding detail: Please draw a diagram of the field (include hedgerows/surrounding crops/relevant distances or measurements). Highlight surrounding crops and/or non-target species affected. Include wind speed and direction at application.
