TOPNOTCH[®]

Tank mixture compatibility

About Topnotch

Topnotch[®] is a 'fully-loaded' combination of the two best-in-class fungicides for premium control of foliar diseases in barley and wheat. It contains 200 g/L azoxystrobin and 200 g/L propiconazole, two highly effective active ingredients from the strobilurin and triazole fungicide families, in a unique suspo-emulsion (SE) formulation. Topnotch combines two distinctly different modes of action (Group 3/11) for improved spectrum, efficacy and resistance management. Topnotch is registered for the control of Leaf Rust, Net Blotch (net and spot form), Powdery Mildew and Scald in barley; and Septoria Nodorum Blotch, Septoria Tritici Blotch, Powdery Mildew, Leaf Rust, Stem Rust, Stripe Rust and Yellow Spot in wheat.

Adjuvants

There is no need to use surfactants or wetters when applying Topnotch. However, the use of Hasten* 0.5–1% can improve the efficacy of Topnotch against Leaf Rust, Net Blotch (net form) and Scald in barley and Septoria Tritici Blotch and Yellow Spot in wheat when applied ≤ 300 mL/ha. Refer to registered label for details. The use of an adjuvant when Topnotch is applied at ≥ 300 mL/ha has not been tested and is not recommended.

Physical compatibility

Independent testing has examined the physical compatibility of Topnotch with a range of other crop protection products. These tests have confirmed Topnotch is compatible with the following products when applied at 600 mL/ha and in a water volume of 50 L/ha:

Herbicides	Insecticides	Plant growth regulator
Amicide* Advance 700	Aphidex [®] 500	Optex [®]
Ardeo [®] + Hasten*	Aphidex [®] 800	
Broadstar [®] + Wetspray [®]	Ballistic [®] Elite	
Bronco [®] 400	Electra [®] 225	
Bronco [®] MA-X	Karate*	
Colt [®]	Pyrinex [®] Super	
Cutlass [®] 500	Trojan*	
Flagship [®] 400	Strike-Out [®]	
Leopard [®] 200 + Hasten*	Venom [®] 240	
LVE MCPA	Wizard [®] 36	
MCPA 750		
Outshine [®] + Uptake*		
Platinum [®] 240 + Hasten*		
Quadrant [™]		
Shogun [®] + Hasten*		
Velocity* + Hasten*		
Vortex [®] + Uptake*		
Zulu [®] XT		

FUNGICIDE

Topnotch®

Use caution when tank-mixing Topnotch with the following products:

- Alpha Scud® 300 Firepower® + Hasten*
- Legacy® MA
- Platinum® 360 + Hasten*

The following products are incompatible with Topnotch:

- Eclipse* + Uptake*
- Mandate® + Hasten*
- Precept* + Hasten*
- Triathlon®

Liquid fertilisers

Independent testing has examined the physical compatibility of Topnotch with a range of liquid fertilisers. These tests have confirmed Topnotch is compatible with the following products:

- Flexi-N (20 L/ha)¹
- SprayGro* Bluestripe Triple (5 L/ha)²
- SprayGro* Bluestripe Triple (5 L/ha) + Wetspray® (200 mL/ha)²
- SprayGro* Smartrace Triple (5 L/ha)²
- SprayGro* Gripper Triple (5 L/ha)²
- SprayGro* Firmrite Spray Cal N (15 L/ha)²
- SprayGro* Result Plus (15 L/ha)²
- SprayGro* Flag (5 L/ha)²
- Ezyflow Zinc (500 mL/ha)³
- Ezyflow Zinc (500 mL/ha) + Amicide* Advance (1.2 L/ha)³

¹Topnotch 600 mL/ha application rate and 50 L/ha water volume.

²Topnotch 530 mL/ha application rate and 45 L/ha water volume.

³Topnotch 300 mL/ha application rate.

These tests confirmed there is no requirement to use Wetspray® 1000 to improve the compatibility of SprayGro* liquid fertilisers. However, it is possible that higher inclusion rates of either Topnotch or fertiliser (or reduced water rate) may impact the results.
