Maxentis® Opti

Physical compatibility guide

The following products have been tested for physical compatibility under constant agitation with Maxentis® Opti fungicide. This is a physical compatibility guide only. As environmental conditions vary, particularly under adverse crop growing conditions, the crop safety of these mixtures is not guaranteed. Always read and follow the product label directions of all tank-mix partners. Follow the ADAMA Tank Mixing Guide for the correct mixing order. Three-quarters fill the tank with water before adding product while agitating, allowing time for each product to disperse completely before adding the next product. Spray immediately. Maintain constant agitation during application. Tank-mixes must NOT be left in the spray tank to stand.

Compatible: The mixture is physically compatible.

Caution: Constant agitation is required. Do not leave stand in the tank for any period of time. Allow sufficient time for each product to disperse uniformly throughout the tank before adding the next product.

Incompatible: This combination is not recommended.

Always read and follow the product label directions of all tank-mix partners. **Care must be taken when tank mixing more than two products, particularly products that are not manufactured by ADAMA, due to potential variation in formulations or product quality. Seek competent advice or perform a jar test if unsure before proceeding.** Note that physical compatibility tests determine whether the products will mix and are suitable for application using commercial spray equipment. Physical compatibility tests do not check for adverse crop effects or the biological efficacy of the individual products when applied as a tank-mix. Recommendations for use, handling, storage and disposal of products may also change over time. The information contained in this document is not intended to replace the product label. The product label, safety data sheet and supporting product information can be viewed on the ADAMA website www.adama.com or by scanning the QR code located on this document or the product packaging.
