## Axiom<sup>®</sup> MZ WG

FUNGICIDE

AXIOM<sup>®</sup> MZ WG is a systemic and residual fungicide for the control of downy mildew, Alternaria, early and late blight diseases on many crops. By combining the two ingredients of metalaxyl-m and mancozeb, AXIOM MZ WG provides excellent disease control from within the plant as well as externally.

**Active Ingredient:** metalaxyl-m 40g/kg +  
mancozeb 640g/kg

**Formulation:** WG (water dispersible granule)

### Mode of Action:

Metalaxyl-m is a systemic fungicide that penetrates rapidly into the plant through the leaves and stems and is distributed upwards with the flow of sap. This way, new growth is protected as well.

Mancozeb is a protective residual fungicide; it provides a protective film over the plant surfaces and inhibits germination of the spores.

It acts as a contact fungicide on the surface of the plant to control leaf and tuber blight as well as leaf spot disease.

### Main Benefits of Using AXIOM<sup>®</sup> MZ WG

- Its systemic and contact action provides excellent disease control from within the plant as well as externally.
- Resistance Management – combines two mode of actions GRP4 & M3 reduces susceptibility to resistance development and in rotation with other modes of action extends their lifespan
- Outstanding preventative and curative activity combined with excellent rainfastness.

CROP	DISEASE	RECOMMENDED RATE	Harvest withholding (days after application)
Cucurbits	Downy Mildew/Alternaria	250g/100L	7
Grapevines	Downy Mildew	250g/100L	14
Lettuce	Anthrachnose/Downy Mildew	250g/100L	14
Onions	Downy Mildew	250g/100L	7
Ornamentals	Downy Mildew	150-250g/100L	-
Potato	Late Blight/Early Blight/Pink Rot	250g/100L	7
Poppies	Downy Mildew	2.5kg/Ha	49
Rhubarb	Downy Mildew	2.5kg/Ha	14
Strawberries (non-fruited)	Eye spot/various	100g/100L	7
Tobacco (field)	Blue mould	250g/10L	7
