Brevis Mixing Guide

| | | |
|---|--|---|
| 1 | Ensure the sprayer is clean and in good working order |  |
| 2 | Calibrate the sprayer |  |
| 3 | Half fill the spray tank with clean water and begin agitation |  |
| 4 | Very slowly add the required quantity of Brevis® while continuing to fill the spray tank |  |
| 5 | Wait for Brevis® to dissolve |  |
| 6 | Triple rinse empty container and add rinsate to the tank |  |
| 7 | Continue agitation until spraying is complete |  |
| 8 | Do not leave the sprayer standing with the spray mixture in it for prolonged periods |  |
| 9 | Do not mix with any wetting agents or surfactants |  |
