

ADAMA

# Ultron<sup>®</sup> 900 WG herbicide

## Physical compatibility guide

The following products have been tested for physical compatibility under constant agitation with Ultron<sup>®</sup> 900 WG. Under commercial use conditions, ADAMA now advises that Ultron 900 WG should not be tank-mixed with any glyphosate product, which also now includes glyphosate IPA 450 g/L formulations.

We recommend following the below cautionary practices when mixing with Ultron:

- Apply with high water volumes (minimum 80 L/ha)
- Add granules to the spray tank slowly and ensure they are fully dispersed before the addition of other tank-mix products

- Maintain constant agitation
- Growers need to check and clean filters between tanks
- Conduct a jar test to confirm compatibility when more than one product is to be tank-mixed with Ultron
- Follow best practice tank mixing procedures, available for download at [www.adama.com](http://www.adama.com)
- Tank mixes must NOT be left in the spraytank overnight.

Compatibility tests confirmed Ultron is compatible with paraquat formulations Spraytop<sup>®</sup> 250, Spraytop 330 and Syngenta Gramoxone\* 360 Pro.

**Table 1: Physical compatibility of Ultron in two-way herbicide tank-mixes.**

Ultron 900 WG application rate (g/ha)	Partner product	Partner application rate (g or mL/ha)	Water volume (L/ha)	Classification
2300	Avadex* Xtra	2000	80	Compatible
1700	Cavalier <sup>®</sup> 240 BS1000*	100 0.1% v/v	80	Compatible
2300	Diuron 900 WG	1100	80	Compatible
1700	Elevate <sup>®</sup> 400 BS1000*	45 0.1% v/v	80	Caution
1700	Flagship <sup>®</sup> 400	400	80	Compatible
2300	Gramoxone* 360 Pro BS1000	1670 0.25% v/v	80	Caution
1100	Palmero <sup>®</sup> 750 WG	100	50	Compatible
1700	Reflex*	1500	80	Caution
1700	Simanex <sup>®</sup> 900 WG	1100	80	Caution
1100	Spinnaker <sup>®</sup>	100	80	Caution
2300	Spraytop <sup>®</sup> 250	2000	80	Compatible
2300	Spraytop <sup>®</sup> 330	1500	80	Compatible
2300	Sprayseed*	2400	80	Compatible
1700	Terrain*	30	80	Compatible
1700	Trilogy <sup>®</sup>	2000	80	Caution
1700	Wipe-Out <sup>®</sup> 450	2000	80	Incompatible

**Compatible:** The mixture is physically compatible.

**Caution:** Constant agitation is required. Do not leave stand in the tank for any period of time. Allow sufficient time for each product to disperse uniformly throughout the tank before adding the next product.

**Incompatible:** This combination is not recommended.

Always read and follow the product label directions of all tank-mix partners. Care must be taken when tank mixing more than two products, particularly products that are not manufactured by ADAMA, due to potential variation in formulations or product quality. Seek competent advice or perform a jar test if unsure before proceeding. Note that physical compatibility tests determine whether the products will mix and are suitable for application using commercial spray equipment. Physical compatibility tests do not check for adverse crop effects or the biological efficacy of the individual products when applied as a tank-mix. Recommendations for use, handling, storage and disposal of products may also change over time. The information contained in this document is not intended to replace the product label. The product label, safety data sheet and supporting product information can be viewed on the ADAMA website [www.adama.com](http://www.adama.com) or by scanning the QR code located on this document or the product packaging.
