

ADAMA

Electra® 900 SP VeripHy®

Physical compatibility guide

The following products have been tested for physical compatibility under constant agitation with Electra® 900 VeripHy® at 600 mL/ha. Maintain constant agitation during application. Always follow best practice tank mixing procedures – download at www.adama.com.

Table 1: Physical compatibility of insecticides with Electra® 900 VeripHy® (600 mL/ha in 100 L/ha at 5°C).

Partner product(s)	mL or g/ha	Classification
Albatross® 200	250	Compatible
Aphidex® 800 WG	500	Compatible
Avatar* Evo	25	Incompatible (15°C)
Lascar®	500	Caution
Movento*	400	Compatible
Plemax®	300	Compatible
Primal®	380	Compatible
Receptor®	600	Compatible
Skope®	350	Compatible
Success* Neo	40	Compatible
Transform*	40	Compatible
Trivor®	800	Compatible
Venturi® MAX	12.5	Compatible
Vertimec*	750	Compatible
Summer Oil	5000	Compatible

Compatible: The mixture is physically compatible.

Caution: Constant agitation is required. Do not leave stand in the tank for any period of time. Allow sufficient time for each product to disperse uniformly throughout the tank before adding the next product.

Incompatible: This combination is not recommended.

INSECTICIDE

Electra® 900 SP VeripHy®

Table 2: Physical compatibility of fungicides with Electra® 900 VeripHy® (600 mL/ha in 100 L/ha at 5°C).

Partner product(s)	mL or g/ha	Classification
Belanty*	80	Compatible
Cabrio*	40	Compatible
Custodia® Forte	32	Compatible
Dithane*	200	Caution
Folpet® 800 WG	125	Caution
Fontelis*	150	Compatible
Howzat®	50	Compatible
Kocide* Blue Xtra	150	Compatible
Luna* Experience	60	Compatible
Nordox 750 WG	200	Compatible
Merivon*	40	Compatible
Octave*	100	Caution
