HERBICIDE

Elevate® 400 EC Herbicide

Correct mixing order

Step 1	Fill the spray tank to at least 70% full. Commence agitation	
Step 2	Add any water conditioners Ammonium Sulphate or LI 700*	
Step 3	Add any Wettable powders (WP)	
Step 4	Add any Water Dispersible/Soluble Granules (WG/WDG/DF/SG) e.g. Farmozine® WG, Simanex® WG, Mentor® WG	
Step 5	Allow sufficient time for any granular products to completely disperse	
Step 6	Add any Suspension Concentrate (SC) products e.g. Rustler* 500 SC	
Step 7	Add any Dispersible concentrate (DC) products	
Step 8	Add any Suspo-emulsion (SE) or Emulsifiable Concentrate (EC) products e.g. Prosulfocarb 800 EC, Trifluralin 480 EC	
Step 9	Fill the spray tank to nearly full	
Step 10	Add any Soluble Liquid (SL) products (including Aqueous Concentrate (AC) products) e.g. Zulu® XT	
Step 11	Add any SL glyphosate products e.g. Wipe-Out® Pro or paraquat products e.g. Spraytop®	
Step 12	Add any Oil Dispersion (OD) products	
Step 13	Add adjuvants e.g. BS1000* and Oils e.g. Uptake* or Hasten* last and fill the tank.	

Compatible: This mixture is physically compatible when the correct mixing order is followed and mix is under constant agitation, in adequate volumes of water. Allow sufficient time for each product to disperse uniformly through the tank before adding the next product.

Caution: Extra care is required with product addition and dispersion to ensure compatibility- allow longer time for dispersion before addition of further products. Higher water rates may improve compatibility. Check filters and clean between loads. Differences in product brands and formulations can vary outcomes. Do not leave to stand in the tank for any period of time.

Incompatible: This combination is not recommended.

Always read and follow the product label directions of all tank-mix partners. **Care must be taken when tank mixing more than two products, particularly products that are not manufactured by ADAMA, due to potential variation in formulations or product quality.** Seek competent advice or perform a jar test if unsure before proceeding. Note that physical compatibility tests determine whether the products will mix and are suitable for application using commercial spray equipment. Physical compatibility tests do not check for adverse crop effects or the biological efficacy of the individual products when applied as a tank-mix. Recommendations for use, handling, storage and disposal of products may also change over time. The information contained in this document is not intended to replace the product label. The product label, safety data sheet and supporting product information can be viewed on the ADAMA website (adama.com) or by scanning the QR code located on this document or the product packaging.
