Section 4.  First Aid Measures

Routes of Exposure:

If in Eyes  Rinse cautiously with water for 15 minutes. If eye irritation persists: Get medical advice.

If on Skin  Wash with plenty of soap and water. If skin irritation occurs: get medical advice/attention.

If Swallowed  Wash out mouth thoroughly with water. Never give anything to the mouth of an unconscious person. If vomiting occurs, place victim face downwards, with the head turned to the side and lower than the hips to prevent vomit entering the lungs. Seek medical attention if needed.

If Inhaled  Remove person to fresh air. Remove contaminated clothing and loosen remaining clothing. Allow person to assume most comfortable position and keep warm. Keep at rest until fully recovered. Get medical advice if breathing becomes difficult.

Most important symptoms and effects, both acute and delayed

Symptoms:

Inhaled:  Fatal if inhaled.
Ingestion: Harmful if swallowed.
Skin: Harmful if in contact with skin.
Chronic: Not applicable.

Notes to a physician:
There is no specific antidote. Treat symptomatically and give supportive therapy.
