READ SAFETY DIRECTIONS BEFORE OPENING OR USING

Afalon® Herbicide

ACTIVE CONSTITUENT: 450 g/L Linuron

GROUP C HERBICIDE

For control of certain weeds in cereals, potatoes, carrots, coriander and other crops as specified in the Directions for Use table.

DIRECTIONS FOR USE:

Restraints:
DO NOT add wetting agents, surfactants or crop oils.
DO NOT apply to weeds under severe stress due to, for example, very dry or wet conditions, disease, etc.
DO NOT allow mixture to stand in vat for prolonged periods, as it is difficult to re-suspend and may lose effectiveness.
DO NOT apply with misting machines.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD:
CROPS: DO NOT APPLY LATER THAN 10 WEEKS BEFORE HARVEST.
CEREALS, MAIZE, ONIONS, PARSNIPS, POTATOES, SOYBEANS, SWEET CORN:
WITHHOLDING PERIOD NOT REQUIRED WHEN USED AS DIRECTED.

GENERAL INSTRUCTIONS
AFAFON Herbicide contains 450 g/L Linuron. AFAFON can be applied pre- and post-emergence to control certain annual grasses, broadleaved weeds and some seedling perennial weeds in cereal, potatoes, carrots, parsnips, coriander, onions, soybeans, maize and sweet corn. AFAFON is a selective systemic herbicide, absorbed principally by the roots but also by the foliage, with translocation primarily acropetally in the xylem. Read the Directions for Use before using this product. Shake well before opening.

RESISTANT WEEDS WARNING
AFAFON Herbicide is a member of the Urea-group of herbicides. This product has the photosynthesis inhibitor mode of action. For weed resistance management AFAFON is a Group C Herbicide. Some naturally occurring weed biotypes resistant to Linuron and other Group C herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by AFAFON or other Group C herbicides. However, resistance should not be assumed without first viewing the method of application, the coverage and the timing of application. Resistance to Linuron cannot be predicted and may occur at any time.

APPLICATION
Shake well before use. Fill the spray tank with water to three quarters of the required volume, then pour AFAFON into the tank with the agitation system running. Top up to required volume with water while still agitating. If combining with Rhino®, add AFAFON last. Ensure good agitation to give continuous suspension of AFAFON. After use flush out system with clean water and wash nozzles and filters.

BOOM SPRAYS: Use approximately 80 L-110 L water per hectare (ha).
AIRCRAFT: Use 20 L-30 L water per hectare (ha).
DO NOT exaggerate swath width.

COMPATIBILITY
LINUREX FLOWABLE may be mixed with Rhino where recommended. DO NOT add wetting agent.

PROTECTION OF WILDFIRE, FISH, CRUSTACEANS AND ENVIRONMENT
DO NOT contaminate streams, rivers and waterways with chemicals or used containers.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS
DO NOT plant susceptible crops (e.g. crucifers, lettuce) immediately following crops treated with AFAFON. DO NOT apply under weather conditions, or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. Avoid overspraying, particularly on headlands or when turning. DO NOT apply on light soils if heavy rain is likely within 24 hours of spraying as weed control may be reduced or some crop damage may occur. This is of particular importance with rates above 1 L/ha and on soybeans.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

APVMA Approval No: 57048/100608

SAFETY DIRECTIONS
May irritate the eyes and skin. Avoid contact with the eyes and skin. DO NOT inhale vapour or spray mist. If product on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

MSDS
Additional information is listed in the material safety data sheet (MSDS). A material safety data sheet for AFALON is available from Adama on request. Call Customer Service on (02) 9431 7800.

CONDITIONS OF SALE: The use of AFALON Herbicide being beyond the control of the manufacturer, no warranty expressed or implied is given by Adama Australia Pty. Ltd. regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and Adama Australia Pty. Ltd. accepts no responsibility for any consequence whatsoever from the use of this product.
