## Brevis Mixing Guide

1. **Ensure the sprayer is clean and in good working order**
2. **Calibrate the sprayer**
3. **Half fill the spray tank with clean water and begin agitation**
4. **Very slowly add the required quantity of Brevis® while continuing to fill the spray tank**
5. **Wait for Brevis® to dissolve**
6. **Triple rinse empty container and add rinsate to the tank**
7. **Continue agitation until spraying is complete**
8. **Do not leave the sprayer standing with the spray mixture in it for prolonged periods**
9. **Do not mix with any wetting agents or surfactants**
