MIRADOR XTRA®

OILSEED RAPE

MIRADOR XTRA® contains both a triazole and a strobilurin for the control of a wide range of diseases in winter and spring oilseed rape.

Key Benefits

- Provides additional green leaf retention and yield benefit
- Earlier timing may be useful where no spring PGR applied
- Azoxystrobin shown good activity on verticillium at the early end of the flowering window
- **MIRADOR XTRA®** has both contact and systemic properties

Product Information

Active ingredients:
200g/L azoxystrobin
80g/L cyproconazole

Formulation:
Suspension Concentrate

Pack size: 5 litres

Crop Information

Crops	Max individual dose (L/ha)	Max number of applications	Latest time of application
Oilseed rape	1.0	2	Up to and including GS79 (nearly all pods have reached final size) or 30 days before harvest, whichever is sooner

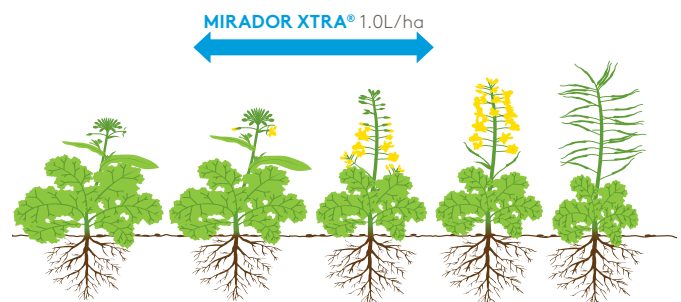

Application Information

Water volume: 200L/ha

Spray quality: Medium

Rainfastness: 1 hour

- Best results achieved from applications made as a protectant treatment following a disease risk assessment
- Second treatment may be required if disease pressure remains high
- Optimum timing is early - mid flowering (GS 60-65)
- A late application against Sclerotinia will also limit development of Alternaria
