

MIRADOR XTRA®

SUGAR BEET

As the threat of foliar disease infection increases from July onwards, agronomists and growers should consider protecting their crops with Mirador Xtra®.

Mirador Xtra® combines the azole cyproconazole and strobilurin azoxystrobin to provide excellent control of the 4 key foliar diseases, with the ability to deliver 22% more cyproconazole than other products thus maximising curative activity particularly against rust.

Product Information

Active ingredients:

200g/L azoxystrobin & 80g/L cyproconazole

Formulation: Suspension Concentrate

Pack size: 5 litres

Application Information

Water volume: 200L/ha

Spray quality: Medium

Rainfastness: 1 hour

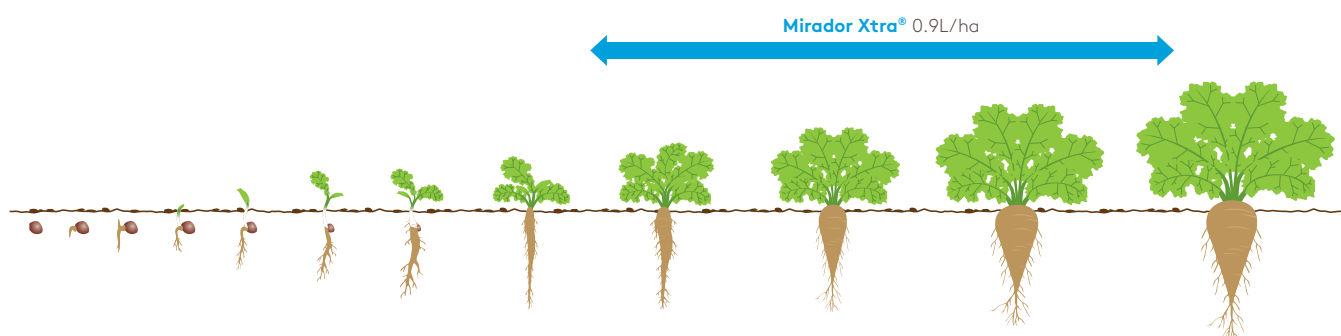

Key Benefits

- Outstanding performance against Rust, with excellent control levels up to nine weeks after application
- Broad spectrum control of key diseases
- In an extensive seven-trial study, a two-spray **Mirador Xtra®** programme delivered an average 2.4t/ha extra sugar yield
- For maximum efficacy and persistence apply at the first signs of disease, but before infection gets established
- If weather conditions are favourable to disease a second application should be made before signs of re-infection
