MOJAVE[®]

BARLEY

MOJAVE[®] is a unique multi-site protectant fungicide for barley providing an anti-resistance strategy for the control of Rhynchosporium and a range of other diseases.

POWERED BY

MSI Protech

Key Benefits

- Good contact protectant activity against Rhynchosporium at T0/T1 timings and Ramularia at T2.
- Improved ramularia protection by including MOJAVE[®] at T1 and T2.
- Does not interfere with the uptake of curative partner products.
 - Maximises what is applied (triazoles, SDHIs).
- Intrinsic activity on brown rust and mildew.
- Multi-site activity to delay resistance development and extend the effective life of single site partner product.

Crop Information

Crop	Max individual dose (L/ha)	Max total dose (L/ha)	Latest time of application
Winter & spring barley	1.5	3.0	Before end of heading/ inflorescence fully emerged (GS 59)

Product Information

Active ingredients:

500g/L folpet

Formulation:

Suspension Concentrate

Pack size: 5 litres

Application Information

Water volume: 200-400L/ha

Spray quality: Medium

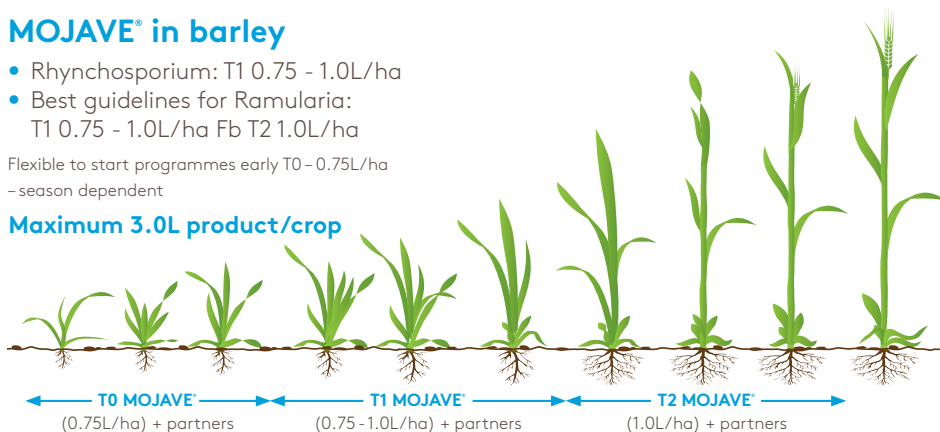

LERAP: B

MOJAVE[®] in barley

- Rhynchosporium: T1 0.75 - 1.0L/ha
- Best guidelines for Ramularia: T1 0.75 - 1.0L/ha Fb T2 1.0L/ha

Flexible to start programmes early T0 - 0.75L/ha - season dependent

Maximum 3.0L product/crop

MOJAVE[®] is a registered trademark of the ADAMA group. MOJAVE[®] contains 500g/L (39.5% w/w) folpet. Use plant protection products safely.
