

# Galil

An insecticide for the control of thrips, aphids and whitefly nymphs on roses and on tomatoes

ADAMA

GALLIL PROTECTION

# Broad Spectrum Control due to 2 modes of action

## Benefits for the farmer:

### Excellent knock-down effect

Within few hours the pests stop feeding on your crop

### Strong residual effect

The crop is protected for a long period

### Rain fast

The product is absorbed in the plant within a few hours

### Crop Safety

Safe at recommended dosage to all of the registered crops

### No impact on environment

Very safe compound for humans & environment

## DIRECTIONS FOR USE:

Crops	Pests	Rate ml/Ha	Water spray volume	Rate in 20 L of water
Tomatoes	Aphids, thrips and white flies	250 mL	400L/Ha	12.5 ml
Roses	Aphids, thrips, white flies nymphs	250 mL	1000L/Ha	5 ml

Find us on Facebook  
ADAMA East Africa

## APPLICATION TIMING & TECHNIQUE:

### Mixing and Timing of Application:

Mix the required amount of GALIL with sufficient water and apply on sighting of insects and thereafter once more during the growing season of the crop.

**Re-Entry Interval:** 24 hours

Pre-Harvest Interval in tomatoes: 3 days

### Use limitations:

GALIL is an agricultural systemic and contact insecticide. It should be used only as recommended. To avoid possibility of phytotoxicity, do not apply in hot weather.

**Always read the label carefully before use**
