

General Information

Pyrinex 48EC is an insecticide for control of cotton scales on cotton & armyworm control.

Mode of Action

Pyrinex 48EC is effective by contact, ingestion and fumigant action. It has little systemic activity but its fumigant action is sufficient to give good protection on nearby untreated surfaces.

Direction for use

Crop	Pest	Application Method	Application rate
Cotton	Cotton scales	Foliar Spray	2.5L/Ha, 50ml/20 litres

*Armyworm control use 2L in 1000L of water.

Re-Entry Interval: 6 hours.

Application Timing and Technique: Apply Pyrinex 48EC when a first sign of pest attack is noticed, ensure good coverage. Ensure good coverage of the crop canopy by using a spray volume of 1000 L per Ha.

Preparation of Spray Mixture: Half fill the spray tank (knapsack) with water. Add the required amount of Pyrinex 48EC, then fill the water to the required level and mix or agitate thoroughly to uniformity. Ensure that the mixture is used the same day.

Hazards/precautions: Hazardous if swallowed, inhaled or absorbed through the skin. Wear approved pesticide respirator if exposed to higher concentrations of Pyrinex 48EC for extended period of time.

Handling: Wear protective clothing, hand gloves, face shield, and impermeable boots when preparing the spray mixture and when spraying. Avoid breathing the spray mist, contact with skin, eyes and clothing. Do not apply upwind and stay out of spray mist. Do not smoke, drink or eat while handling the product.

After Work: Change clothes and wash hands and face thoroughly with soap and water. Wash the spray equipment and any contaminated clothing carefully.

Disposal: Triple rinse, puncture or crush empty containers before disposal in a safe and authorized place in accordance with National regulations on chemical disposal. Do not re-use empty containers for any other purpose. Pesticide spray mixture or rinsate that cannot be used must be disposed where it cannot contaminate surface water and ditches.

Wildlife and Environmental Protection: Pyrinex 48EC is toxic to fish and other aquatic organisms. Do not contaminate ponds and water ways by direct application, cleaning of equipment, disposal of wastes and empty container. A band width of 15m should be observed. Toxic to bees- Do not spray in full broom

FIRST AID INSTRUCTIONS: If inhaled: Remove the patient to fresh air. If in contact with skin: Take off contaminated clothing, Wash the skin with plenty of water and soap. If in contact with eye: Rinse thoroughly with running water for at least 15 minutes, see a doctor. If swallowed: Do not induce vomiting. Wash (rinse) the mouth immediately and keep the subject calm and then give plenty of water if able to swallow. In all cases seek medical attention where needed.

TOXICOLOGICAL INFORMATION: Symptoms of poisoning: Pyrinex 48EC causes headache, dizziness, blurred vision, nausea, diarrhea, and discomfort in the chest, weakness, nervousness, salivation, uncontrollable muscle twitcness, convulsion, and coma.

Antidote: Alpine Sulphate

Note to physician:

Treatment: Use 2mg of atropine intravenously
