

GALIL

A broad spectrum insecticide for control of a wide range of pests on field crops and vegetables

ADAMA

Galil 300 SC is a combination of two different molecules and therefore has efficient systemic and contact activity against a wide spectrum of pests:

Chewing insect pests - termites, grasshoppers, army worms, grubs and other defoliators on these crops.

Sucking insect pests - whiteflies, aphids and thrips.

DIRECTIONS FOR USE:

Preparing spray mixture: Shake well before use. To prepare a spray solution, half-fill the spray tank with clean water. Pour the required quantity of Galil 300 SC into the spray tank; Gently agitate the machine. Fill the spray tank with water to the required level while agitating continuously.

Application: Galil 300 SC can be applied by means of any suitable knapsack sprayer (including motorized) which is able to distribute the spray solution evenly and effectively over the target area.

Crops	Dosage
Vegetables (onions, tomatoes, pepper)	25-30 ml/16 Lt water or 250-300 ml/Ha
Other crops (legumes, paddy rice, cotton)	25-30 ml/16 Lt water or 250-300 ml/Ha

Always read the label carefully before use
