30 days

PRE-HARVEST INTERVAL:

60 days

STORAGE:

Store in a heated facility. If product is frozen, bring to room temperature and agitate well before use.

QUICK TIPS:

FORCEFIGHTER® M's activity is influenced by weather conditions. The optimal temperature is 12 – 24° C. Avoid application 3 days before or after frost. Do not apply before the 2-leaf stage as crop injury may occur. Use 38 L/ac application volume when there is a heavy canopy or when most weeds are at an advanced stage of growth. Do not apply by air.

Always read and follow registered product label instructions. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.
