## Quick Tips

FORCEFIGHTER ALL IN™ combines three active ingredients and two modes of action to deliver more broadleaf weed killing power per acre than comparable products. In fact FORCEFIGHTER ALL IN™ has 13% more active ingredient per acre than the competitive product.

Do not apply before the 2-leaf stage as crop injury may occur. Use 38 L/ac application volume when there is a heavy canopy or when most weeds are at an advanced stage of growth. Activity is influenced by weather conditions. Optimal application temperature is 12 – 24° C. Avoid application 3 days before or after frost and do not apply by air.

Always read and follow label directions.
