³ 2- to 6-leaf

⁴ 1- to 4-leaf

⁵ Non imidazolinone-tolerant varieties

HOW IT WORKS:

DAVAI® A PLUS combines two (2) actives to tackle broadleaf and grassy weeds. See DAVAI® 80 SL and ARROW ALL IN® for more information.

DAVAI® A PLUS

CROP STAGING:

- Dry beans, Soybeans: Emergence to 3 expanded trifoliolate leaves
- Field peas: 1 – 6 true leaf

MIXING INSTRUCTIONS:

1. Fill clean tank ½ to ¾ full of clean water and turn agitation on.
2. Start sprayer tank agitation.
3. Add the required amount of DAVAI® 80 SL herbicide and continue to agitate.
4. Add the required amount of ARROW ALL IN® herbicide and continue to agitate.
5. If necessary, add any required adjuvants or surfactants for tank-mix partners.
6. Complete filling the tank with water as agitation continues.

NOTE: If tank-mixing, please reference the label of the partner for specific mixing order or follow WAMLEGS or WALES for proper mixing protocol.

RECRIPPING RESTRICTIONS:

There are several factors that effect the re-cropping following an Imidazolinone application. These include in order of importance:

1. **Product:** Imazethapyr, for example, is more persistent than imazamox.
2. **Soil moisture:** Requires more than 125 mm (5") of rain between herbicide application and August 31 in the year of application.
3. **Organic matter:** Brown soil zones (< 3% organic matter) are more susceptible to carryover crop injury the year after application.
4. **Rate:** Depending on the crop and rates, soil residues can be an issue.
5. **Soil pH:** Product persists longer in a pH < 5.5 – 6.

Depending on the following crop the level of sensitivity will vary. Please contact your local ADAMA Area Business Manager for more details.

QUICK TIPS:

For best results, apply DAVAI® A PLUS to actively growing weeds. If the plants are under environmental stress, expect to see temporary yellowing or burning on the leaves.
