ESTEEM ALL IN[®]

HOW IT WORKS:

Moves within the plant to control exposed and underground plant tissues. It mimics naturally occurring plant hormones which control weeds by disrupting normal plant growth patterns. Symptoms of effect include epinasty (twisting of the stems) and swollen nodes.

CROP STAGING:

Spring Wheat, Barley and Oats: 3-leaf to just before the flag leaf.

Winter Wheat in the spring: 3 tiller stage to just before the flag leaf.

REGISTERED AND SUPPORTED TANK MIXES:

- Liquid Achieve[™] SC¹
- Puma[®] Advance
- Traxos[®]
- Varro[®]

¹Tank mixes with Liquid Achieve[™] SC may cause temporary injury if applied before the 4-leaf stage, however, yield will not normally be affected.

This product may be tank mixed with a fertilizer, a supplement, or with registered pest control products, whose labels also allow tank mixing, provided the entirety of both labels, including Directions For Use, Precautions, Restrictions, Environmental Precautions, and Spray Buffer Zones are followed for each product. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed. Do not tank mix products containing the same active ingredient unless specifically listed on this label.

In some cases, tank mixing pest control products can result in reduced pesticide efficacy or increased host crop injury. The user should contact ADAMA Agricultural Solutions Canada Ltd. at 1-855-264-6262 for information before applying any tank mix that is not specifically recommended on this label.
