

Bumper™

250 EC

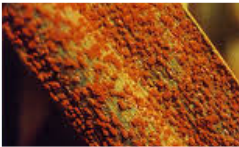

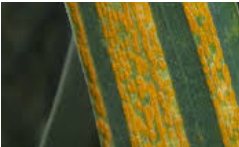

Propiconazole 250 g/L

ADAMA

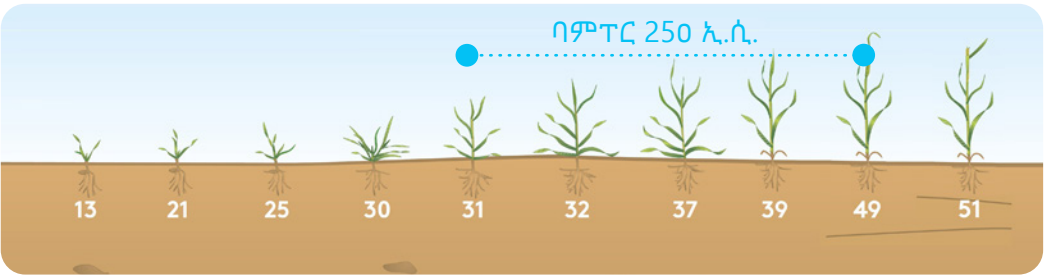

BUMPER™ 250 EC is a systemic fungicide providing curative and preventive action against leaf and stem disease in wheat. BUMPER is quickly absorbed through the leaves and stems and is rapidly translocated in the plants and protects the new growing tissues of the leaves and stems.

BUMPER™ 250 EC Target weeds

Disease name	Symptom on plant	Timing of application	Application rate
Stem rust		BBCH 31-49 = From tillering stage to when head is visible	0.5 L/ha = 40 ml in 16L napsack
Yellow rust			
Powdery mildew			
Septoria			

Application Timing:

BUMPER™ 250 EC should to be applied from tillering stage up to when head is visible. Protection of the flag leaf is the most important

BUMPER™ 250 EC Benefits

Ensure Yield & Quality – protection of the wheat flag leaf

Best Cost-effective fungicide for wheat

Broad spectrum activity against many diseases

Curative and preventive action

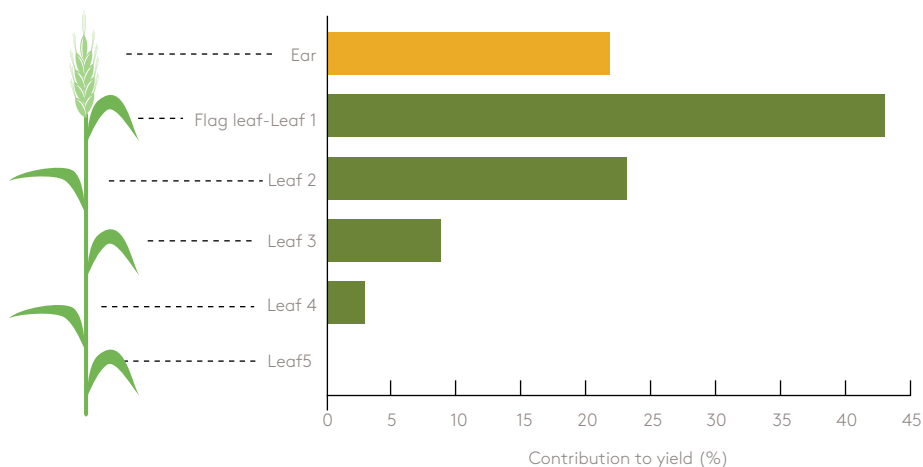

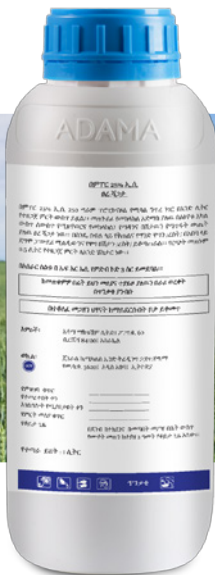

Excellent rain fastness

Directions for Use:

- Ground application - spray volume of 200 liters/Ha.
- Aerial application - spray volume of 30 liters/Ha.

Up to 80% of wheat yield comes from the top three level, so it is vital to protect them

0.5L

1L

1 Bottle = 250 ml

1 Bottle = 10 Knapsacks sprays

Crop	Target Pest	App rate L/ha	App rate ml/16L knapsack
Wheat	Leaf & stem diseases	0.5 L/ha	40 ml x 16 sprays
