

Blasil™

Super Blasticide

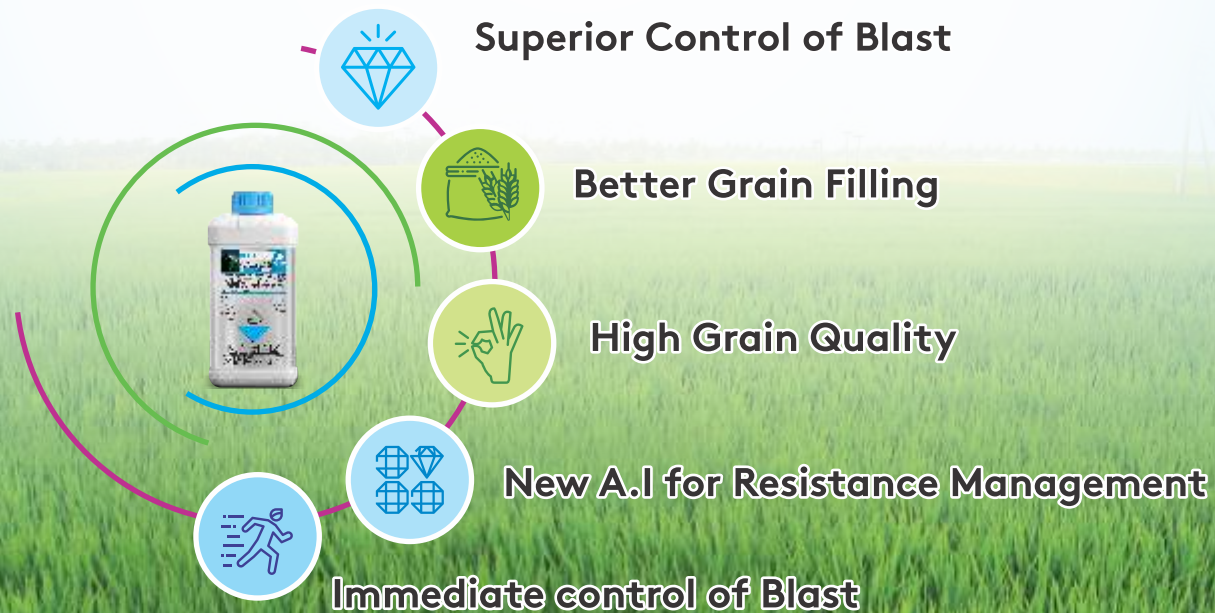

INTRODUCTION:

- **Blasil** is a "SUPER BLASTICIDE" for the control of leaf blast in Rice, provides peace of mind to the farmers with its superior disease control activity.
- **Blasil** combines the strengths of two effective active ingredients to offer superior control of Blast for longer duration.

MODE OF ACTION:

- Inhibition of ergosterol biosynthesis in membranes.
- Inhibition of Melanin synthesis in fungal cell wall.

Key Benefits to the farmers:

Blasil™

Super Blasticide

FEATURES & BENEFITS:

FEATURES	BENEFITS
A differentiated pre-mix solution	Protects the grains during milking stage. Less unfilled grains with improved grain quality
Unique mixture of two active ingredients	Broad Spectrum & superior control of blast fungi
3 Way Action- Contact, Systemic & Translaminar	Quick & long duration control of Blast fungi. Disease free new leaves & Prevents further spread to other plant parts
Dual Mode of Action on the Fungi	Reliable control of the blast with better resistance management
A Suspo-Emulsion (SE) Formulation with a new a.i	Even application & reduced solvent concentration

RECOMMENDATION:

Crop	Disease	Dose/Acre
Paddy	Leaf Blast	400 ml
