

# Zamir™

Experience the Difference

## INTRODUCTION:

- **Zamir** is an innovative fungicide for the effective control of Chilli Dieback & Fruit rot. It is a mixture of novel fungicides intelligently formulated to help a farmer achieve better control of diseases with high quality yield.

## MODE OF ACTION:

- Inhibition of ergosterol biosynthesis in membranes.
- **Zamir**'s active ingredients are quickly taken into the plant, one of which moves slowly while the other moves fast in the plant system resulting in quick control for longer duration.
- **Zamir** has two kinds of Ergosterol inhibitors for effective control over fungi.

## RECOMMENDATION:

Crop	Disease	Dose/Acre
Chilli	Fruit rot, Dieback, Powdery Mildew	400ml

# Zamir™

Experience the Difference
