

ADAMA

Tamar[®]

The best weed control solution
at early stage of Sugar cane

1kg
Per Acre

"Tamar ka Samar, De Fasal ko Umar"

Tamar[®]

Ametryne 80% WDG

- ▶ **Tamar** is a new selective early post herbicide on Sugarcane which has broad spectrum activity on grasses and broad leaved weeds.
- ▶ **Tamar** belongs to the s-triazines chemical group which inhibits Photosynthetic reaction in weeds.
- ▶ **Tamar** has both foliar and soil activity. By this it kills the existing weeds & the new emergence from weed seeds.
- ▶ **Tamar** is compatible with 2, 4-D.
- ▶ **Tamar** shall be applied when Sugarcane weeds are at 2-4 leaf stage. It provides longer duration of weed control. Protects sugarcane from early slow growth of sugarcane tillers from weed competition.

Available Pack sizes: 50g, 100g, 250g, 500g, 1kg, 5kg

Antidote:

There is no specific antidote. Treat symptomatically & supportively

Recommendation for use:

Crop	Weeds	Dosage	
		kg/Hectare	kg/Acre
Sugarcane	<i>Digitaria sanguinalis</i> , <i>Dactyloctenium aegyptium</i> , <i>Cynodon dactylon</i> , <i>Trianthema monogyna</i> , <i>Ageratum conyzoides</i>	2.5	1
