

Glyphogan®

Glyphosate 41% SL IPA Salt

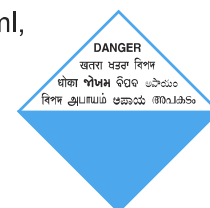

- ▶ **Glyphogan** is a non-selective, non-residual post-emergence herbicide which is absorbed by foliage and translocated throughout plant.
- ▶ **Glyphogan** is very effective for use on many annual and perennial grasses and broadleaf weeds, as well as on many tree and woody brush species in cropland and non-crop sites.
- ▶ **Glyphogan** may be applied for general weed control in non-crop industrial, recreational and public areas, and in farmstead weed control. It may also be used to control unwanted vegetation in row crops, vine crops and tree orchards.
- ▶ **Glyphogan** is of low toxicity to birds and aquatic organisms and non-toxic to bees.

Available Pack sizes: 250ml, 500ml, 1ltr, 5ltr, 20ltr, 200ltr

Antidote:

Give supportive and symptomatic treatment. There is no specific antidote

Recommendation for use:

Crop	Weeds	Dosage	
		Lt/Hectare	Lt/Acre
Tea	<i>Axonopus compressus</i> , <i>Cynodon dactylon</i> , <i>Imperata cylindrical</i> , <i>Polygonum perfoliatum</i> , <i>Paspalum scrobiculatum</i> , <i>Arundinella bengaliensis</i> , <i>Kalm grass</i> .	2-3	0.8-1.2
Non cropped area	<i>Sorghum halepense</i> and other dicot & monocot weeds in general	2-3	0.8-1.2
