HERBICIDE

Propaquizafop 10% EC

- ▶ **Agil** is a herbicide of the aryloxyphenoxy propionates family.
- ▶ It is used for the post emergence control of a wide range of annual and perennial grasses. **Agil** is used for selective weed control in many broadleaf crops & best results are achieved when spray 2-4 leaf stage.
- ▶ **Agil** is a systemic herbicide, which is quickly absorbed by the leaves and translocated from the foliage to the growing points of the leaves and roots of the sprayed weeds.
- ▶ Rainfall 1 hour after application will not affect the product activity. Optimal activity is achieved when applied early and weeds are actively growing.
- ▶ **Agil** is safe to beneficial insects, mammals and is environmentally friendly.
