

ADAMA India Private Limited

(Formerly known as Makhteshim-Agan India Private Limited)

Presents

The latest Herbicide technology

Zoomer®

Total Control of
Many Broad-leaved,
Sedges &
Grassy Weeds

Unique Solution
for Clean Action
on Annual & Perennial
Weeds

**BEST SOLUTION FOR HARD-TO-KILL WEEDS
QUICKER AND LONGER ACTION**

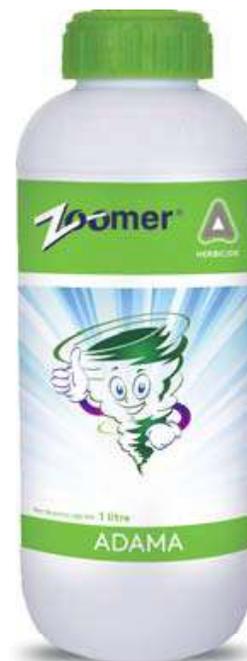

Zoomer®

Oxyfluorfen 2.5%+
Isopropyl amine salt of Glyphosate 41% SC

- ▶ **Zoomer** is a non-selective, contact and systemic herbicide with foliar and soil activity.
- ▶ **Zoomer** has broad spectrum activity on grasses, sedges & broad leaved weeds. It can be used as post emergence application on non-crop, Orchard and plantation crops.

Zoomer combines two a.i.s with two different modes of action: It acts by inhibiting the function of EPSP synthase enzyme (EPSPS), which is important in the biosynthesis of aromatic amino acids, thus resulting in phytotoxicity & eventual death of weeds.

- ▶ It also acts by inhibiting the action of proto porphyrinogen oxidase (PPO ase) enzyme, resulting in quick peroxidation of lipids and thus leading to cell membrane disruption and kill of the plant.
- ▶ **Zoomer** is effective on monocot, dicot, annual & perennial weeds. It shows quicker action on *tough-to-control weeds*. It also provides longer duration of weeds control.

Available Pack sizes: 100ml, 250ml, 500ml, 1ltr, 5ltr, 20ltr

Antidote:

No specific antidote is known.
Treat symptomatically.

Recommendation for use:

Crop	Weeds	Dosage	
		ml/Hectare	ml/Acre
Tea	<i>Ageratum conyzoides</i> , <i>Cyprus spp</i> , <i>Borreria hispida</i> , <i>Paspalum conjugatum</i> , <i>Digitaria ciliaris</i>	2000	800
*Grape	Weed complex	3125	1250
*Non crop	Weed complex	3125	1250
