Enfuse®

Chlorantraniliprole 0.4% w/w GR

- ▶ **Enfuse** belongs to the novel class of chemistry, Anthranilic diamides.
- ▶ **Enfuse** has a new & unique mode of action.
- ▶ **Enfuse** makes the stored calcium in the muscle cells to deplete by activating the ryanodine receptors to release calcium. This action causes impairment of the muscular function leading to paralysis and death of the insect.
- ▶ **Enfuse** has long duration control for lepidopteran insect pests in rice & sugarcane.

Available Pack sizes:
1kg, 4kg

Antidote:
No specific antidote is available, Treat symptomatically

Recommendation for use:

Crop	Insect pest	Dosage	
		kg/Hectare	kg/Acre
Rice	Yellow stem borer, Leaf folder	10	4
