

ADAMA

Correct Mixing Order

Step 1

Fill the spray tank to at least 70% full with suitable water. Commence agitation.

Step 2

Add any Water Conditioners.
e.g. Ammonium Sulphate, RAIZER® 700

Step 3

Add any Wettable Powders (WP).

Step 4

Add any Water Dispersible Granules (WG)/
Soluble Granules (SG).
e.g. KARMEK® 900, BREVIS®, MERPAN® FUNGICIDE

Step 5

Add any Oil Dispersion (OD) formulations.

Step 6

Ensure fully dispersed before proceeding.

Step 7

Add any Flowable Liquids (FL) or Suspension
Concentrate (SC) products.
e.g. ETHOSAT® HERBICIDE, GEM® FUNGICIDE

Step 8

Add any Emulsifiable Concentrate (EC) products.
e.g. PYRINEX® 500 EC, BOLIDE®

Step 9

Add any Emulsion Oil in Water (EW) or
Suspension Emulsion (SE) formulations.
e.g. MAVRIK® AQUAFLO INSECTICIDE, RIFLE®

Step 10

Fill the mixing tank to nearly full.

Step 11

Add any Soluble Liquids (SL).
e.g. FLASH® HERBICIDE, POLARIS® ACCELERATE

Step 12

Add other Adjuvants and fill the tank.

Add any oils last in all mixtures.

Always check labels of all products to be used for manufacturer's tank-mix recommendations. Seek competent advice or perform a jar test if unsure before proceeding. The physical and chemical properties of various manufacturer's formulations may differ. Recommendations for use, handling, storage and disposal of products may also change over time. Please note: This information is not intended to replace the product labels. Always read the complete product label appearing on the container before opening or using products.
