

INJECTA 400

Controlling woody weeds and unwanted trees

JUST GOT EASIER!

Only the Injecta technology allows treatment under many different weather conditions and in challenging terrain. Targeting tree killing, with less chemical, than ever before, reducing your cost of doing business and your environmental footprint.

Applied within seconds

Minimal labour required

30%

30% less chemical than conventional methods

INJECTA 400 STEM INJECTION APPLICATOR

This new technology seals glyphosate capsules directly into woody weeds, killing them from the inside with no unintended environmental casualties.

- Progressive loss of stem vigour
- Defoliation
- Reduction in flowering and seed set
- Chlorosis developing to necrosis
- Plant death
