# MERPAN® FUNGICIDE TANK MIXING GUIDE

**Correct order of addition to the tank mixture is important to get the best results with MERPAN FUNGICIDE (MERPAN).**

**Follow the simple steps below to ensure hassle free spraying.**

Half fill the spray tank. Start agitation. Add **MERPAN** to the half-filled spray tank. Then complete tank filling. Continue to agitate the mixture during filling and use.

**When tank-mixing MERPAN with another product:**

1. First add **MERPAN** to the half-filled tank.
2. Add any fungicides and insecticides to a  $\frac{3}{4}$  full tank with agitation running (add WGs, WPs followed by SCs and EWs).
3. If adding foliar fertilisers such as Calcium Chloride ( $\text{CaCl}_2$ ) or Calcium Nitrate ( $\text{Ca}(\text{NO}_3)_2$ ) or a surfactant, these **must** always be added last. Refer to the specific product labels for any preparation required before adding to the spray tank.

## IMPORTANT

**Continue to agitate the mixture during use. After stoppage agitate thoroughly before beginning to spray again. Do NOT leave mixed spray standing overnight.**

### IMPORTANT

This is not the registered label. Always read product labels carefully before using any product and follow label instructions. For specialist advice in an **EMERGENCY** call **0800 734 607 (all hours)**.
