ADAMA

APOLLO[®] MITICIDE

GROUP 10 INSECTICIDE

**A selective miticide for early season application to pipfruit,
stonefruit, berryfruit, citrus fruit, glasshouse grapes and
hops**

READ THE ATTACHED BOOKLET COMPLETELY BEFORE MIXING OR APPLYING

Active Ingredient:

Contains 500 g/L CLOFENTEZINE in the form of a suspension concentrate

REFER TO BOOKLET FOR FULL LABEL INSTRUCTIONS.

HAZARD CLASSIFICATIONS: 6.9B, 9.3C

PCBU RESPONSIBILITIES

A PCBU with management or control of work using this substance must ensure that every worker who uses, handles, manufactures, or stores this hazardous substance (including hazardous waste) is, before the worker is allowed to carry out or supervise work involving those substances, provided with adequate information, training and instruction. This includes the use of personal protective equipment to be used to minimise risks to the health and safety of workers when carrying out work using this substance.

WARNING

**May cause damage to organs through prolonged or repeated exposure.
Harmful to terrestrial vertebrates.**

HANDLING PRECAUTIONS

Keep out of reach of children.
Do not eat, drink or smoke while using.
Do not breathe spray mist.

EQUIPMENT

A PCBU with management or control of work using this substance must ensure that equipment used to handle this substance retains the substance, without leakage, at all of the temperatures and pressures at which the equipment is to be used; and dispenses or applies the substance, without leakage, at a rate and in a manner that the equipment is designed for. The PCBU must ensure that the equipment is accompanied by documentation that is readily available and readily understandable about the use and maintenance of the equipment.

STORAGE

Store in the original, unopened container in a cool, dry place, out of direct sunlight and away from stockfeed, seeds, fertilisers or foodstuffs.

SHELF LIFE

When stored appropriately this product should show no significant degradation for two years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

PERSONAL PROTECTION

When mixing or applying wear appropriate protective clothing including cotton overalls buttoned to the neck and wrist, impervious, elbow-length gloves, and eye protection. Remove protective clothing and wash hands, arms and face with soap and water before meals and after work.

SPILLAGE

Exclude all bystanders from the vicinity of the spill and prevent material from entering waterways. Wear appropriate protective clothing as in the personal protection section of this label to clean up spills. Absorb liquid spills with an inert material (such as vermiculite, earth, sand or synthetic absorbent substance) and place in waste containers. Wash area with water and alkaline detergent. Then absorb any remaining liquid with further inert material. Dispose of the waste safely in an approved landfill.

DISPOSAL

Container Disposal - Triple rinse empty container and add rinsate to spray tank. Submit clean empty container to an Agrecovery[®] depot for recycling. Alternatively, puncture and bury in a suitable landfill. Avoid contamination of any water supply with product or empty container.

Product Disposal - Dispose of this product only by using according to the label or through the Agrecovery[®] Chemical Recovery service or other approved facility.

FIRST AID

If medical advice is needed, have product container or label at hand.

For advice, or if you feel unwell, contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately.

CONDITIONS OF SALE

ADAMA New Zealand Limited will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply of these goods other than the responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by the Statutes applicable to the sale and supply of these goods. To the extent allowed by such Statutes the liability of ADAMA New Zealand Limited is limited to the replacement of the goods or (at the option of ADAMA New Zealand Limited) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to ADAMA New Zealand Limited within thirty days of delivery.

SAFETY DATA SHEET

A Safety Data Sheet for this product is available from ADAMA New Zealand Limited on request. Call 03 543 8275.

PRODUCT INFORMATION

APOLLO MITICIDE is a highly active mite ovicide with long residual activity. APOLLO MITICIDE has direct contact activity against overwintering and summer eggs of European red mite and Two-spotted mite. It has little activity against adult mites.

Because of its potent ovicidal activity and long residual activity, APOLLO MITICIDE it should be used early season. Apply just before eggs of European red mite hatch, or when adult two-spotted mites first invade the crop and begin laying eggs.

INTEGRATED MITE CONTROL

APOLLO MITICIDE is compatible with Integrated Mite Control (IMC) programmes involving *T.Pyri*; *T. occidentalis*; *P.persimilis*; *A.fallacis*.

DIRECTIONS FOR USE

TAKE ALL REASONABLE STEPS TO ENSURE THAT THE SUBSTANCE DOES NOT CAUSE ANY SIGNIFICANT ADVERSE EFFECTS TO THE ENVIRONMENT BEYOND THE APPLICATION AREA.

**It is an offence to use this product on animals.
Do not apply onto or into water.**

The recommended dilution rates for APOLLO MITICIDE in the following table are for high volume spraying to run-off. For concentrate spraying, adjust dilution rates accordingly. Thorough and complete coverage is important.

CROP	MITE	TIMING AND RATE	CRITICAL COMMENTS
Pipfruit	European red mite	Green tip: 40 mL/100 L	When overwintering egg numbers are high, an early application at green tip is recommended. APOLLO MITICIDE can be applied with spraying oil to provide optimum coverage.
Citrus fruit	Citrus red mite	Pre- or post-blossom: 40 mL/100 L	Apply one application per year. Ensure thorough coverage of all plant parts.
Stonefruit	European red mite	Green tip: 40 mL/100 L	As for pipfruit.
Berryfruit	Two-spotted mite	Pre-blossom: 40mL/100 L	Application should be made prior to first blossom on crop. Ensure thorough coverage of all plant parts.
Glasshouse grapes	Two-spotted mite	Pre-blossom: 40 mL/100 L	As for berryfruit

CROP	MITE	TIMING AND RATE	CRITICAL COMMENTS
Hops	Two-spotted mite	Pre-burr: 40 mL/100 L	Apply in a tank-mix with Omite® 30W miticide prior to burr formation. Only apply 1 APOLLO MITICIDE application per year. Ensure thorough coverage of the crop.

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

WITHHOLDING PERIODS

Pipfruit:	Allow 28 days between spraying and harvest of fruit.
Citrus fruit:	Allow 21 days between spraying and harvest of fruit.
Stonefruit:	Do not use after green tip.
Berryfruit:	Do not use after fruit blossom.
Grapes (glasshouse):	Do not use after green tip.
Hops:	Do not use later than first burr.

MIXING

To ensure a uniform suspension, pour the required amount of APOLLO MITICIDE through the screen into the partly filled spray tank and add the remainder of water with the agitator system running. Maintain agitation throughout spraying and before recommencing spraying after a stoppage. Use all spray as soon as possible after mixing and do not allow to stand for an extended period, such as overnight.

COMPATIBILITY

APOLLO MITICIDE is compatible with spraying oils. It is not compatible with highly alkaline sprays such as Bordeaux or lime sulphur mixtures.

CROP SAFETY

No phytotoxicity has been observed on the fruit or foliage of treated crops.

RESISTANCE MANAGEMENT

APOLLO MITICIDE contains the GROUP 10 mite growth inhibitor, clofentezine. Intensive use of miticides could result in the development of resistant strains of mites. To minimise the risk of resistance developing do not use another product containing a miticide in the same group in conjunction with APOLLO MITICIDE and use strictly in accordance with label directions. Do not apply more than one application of APOLLO MITICIDE per crop per season.

Since the occurrence of resistant strains is difficult to detect prior to use ADAMA New Zealand Ltd accepts no liability for losses that may result from the failure of this product to control resistant mites.

CONDITIONS OF SALE

ADAMA New Zealand Limited will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply of these goods other than the responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by the Statutes applicable to the sale and supply of these goods. To the extent allowed by such Statutes the liability of ADAMA New Zealand Limited is

limited to the replacement of the goods or (at the option of ADAMA New Zealand Limited) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to ADAMA New Zealand Limited within thirty days of delivery.
