When using tank mixes always follow the statutory conditions of all tank mix partners. Physical compatibility tests check that the products will mix and are suitable for application through a conventional sprayer and may not be approved tank mixes. These tests do not check for any adverse crop effects or the biological efficacy of the individual products when applied in a tank mix. ADAMA Agricultural Solutions UK Ltd gives no warranty and accepts no liability in respect of physical compatibilities and use is at growers own risk. VISCOUNT® is a registered trademark of the ADAMA group. VISCOUNT® contains 240g/L (22.2%w/w) clodinafop-propargyl and 60 g/L (5.6% w/w) cloquintocet-mexyl. Use plant protection products safely. TANK MIXES

Tank Mixing with Hormone Herbicides

- **DO NOT** use hormone-containing herbicides in mixture with VISCOUNT®.
- Hormone herbicides may be used in sequence with VISCOUNT®, observing the following intervals:
 - When VISCOUNT® is applied first, leave a minimum of 7 days before applying hormone herbicides
 - If CMPP or 2,4-DB containing products are applied before VISCOUNT® then leave a minimum of 14 days before VISCOUNT® is applied
 - If MCPA or 2,4-D containing products are applied before VISCOUNT leave a minimum of 21 days before applying VISCOUNT®

Tank Mixing with Sulfonyl-ureas and other ALS Inhibitor Herbicides

- Only sulfonyl-urea herbicides listed may be tank mixed with VISCOUNT®
- Sulfonyl-urea herbicides should only be tank mixed with VISCOUNT® when VISCOUNT® is used at the full dose rate (125 mls/ha + adjuvant)
- When targeting wild oats using supported reduced rates of VISCOUNT®, in sequence with SUs (or other ALS inhibitors such as florasulam), the following application intervals should be observed:
 - If VISCOUNT® is applied prior to the product containing sulfonyl-urea or ALS inhibitors then at least 7 days must elapse before the SU/ALS inhibitor product is applied
 - If the product containing SU/ALS inhibitor has been applied prior to the VISCOUNT®, then a minimum of 14 days must elapse before the application of VISCOUNT®

Mixes of VISCOUNT® with non-listed SU/ALS containing products in the spring may result in reduced control of wild oats.
