² minimum 200L/ha water volume

*Pre-em only

~ Only compatible if trace element added first.

[#] Goltix 70 SC should be dispersed in a minimum 50 l/ha water prior to adding fertiliser.

When using tank mixes always follow the statutory conditions of all tank mix partners. Physical compatibility tests check that the products will mix and are suitable for application through a conventional sprayer and may not be approved tank mixes. These tests do not check for any adverse crop effects or the biological efficacy of the individual products when applied in a tank mix. ADAMA Agricultural Solutions UK Ltd gives no warranty and accepts no liability in respect of physical compatibilities and use is at growers own risk. GOLTIX® 70SC is a registered trademark of the ADAMA group. GOLTIX® 70SC contains 4700g/L (58.3% w/w) metatiron. Use plant protection products safely. Always read the label and product information before use. For further product information, including warning phrases and symbols, refer to www.adama.com/uk or call The Technical Helpline on 01635 876 622.
