

ADAMA

TRIBAL®

TRIBAL® is a unique residual, containing pendimethalin, diflufenican and chlorotoluron, providing excellent stand-alone annual meadow-grass control as well as broad-leaved weed activity in winter and spring cereals.

Key Benefits

- Excellent stand-alone annual meadow-grass and broad-leaved weed control
- When combined with flufenacet, TRIBAL® is an important part of black-grass control programmes
- Flexible product label – can be used pre and post emergence in winter cereals and spring wheat and spring barley. Advantageous if pre emergence application is missed due to poor autumn weather conditions
- Low inclusion rate of CTU mitigating water issues

Product Information

Active ingredients:

250g/L chlorotoluron
40g/L diflufenican
300g/L pendimethalin

Formulation:

Suspension Concentrate

Pack size: 10 litres

Crop Information

Crops	Max individual dose (L/ha)	Number of applications	Latest timing
Winter wheat, winter barley, winter triticale & winter rye	2.0	1	Before pseudostem (leaf sheath) erect stage
Spring wheat & spring barley	2.0	1	Before pseudostem (leaf sheath) erect stage

Application Information

Water volume: 150-300L/ha

Spray quality: Medium

Aquatic buffer: 6 metres
