

A post-emergence herbicide for the control of broad-leaved weeds in winter cereals and winter oilseed rape (EAMU).

Advice

FOX® may be used under EAMU 20142318 for control of Geranium Species in OSR, application is 'at the grower's risk'.

- Requires good leaf coverage – 200L/ha water volume recommended
- Add oil where crops are frost hardened to boost efficacy
- Allow 10 days between other applications

Crop Information

Targets	Max individual dose (L/ha)	Maximum total dose (L/ha)	Latest timing
Geranium spp. (<5 leaf)	1.0	1.5	Before flower buds visible (OSR)

Product Information

Active ingredients:
480g/L bifenox

Formulation:
Suspension Concentrate

Pack size: 5 litres

Application Information

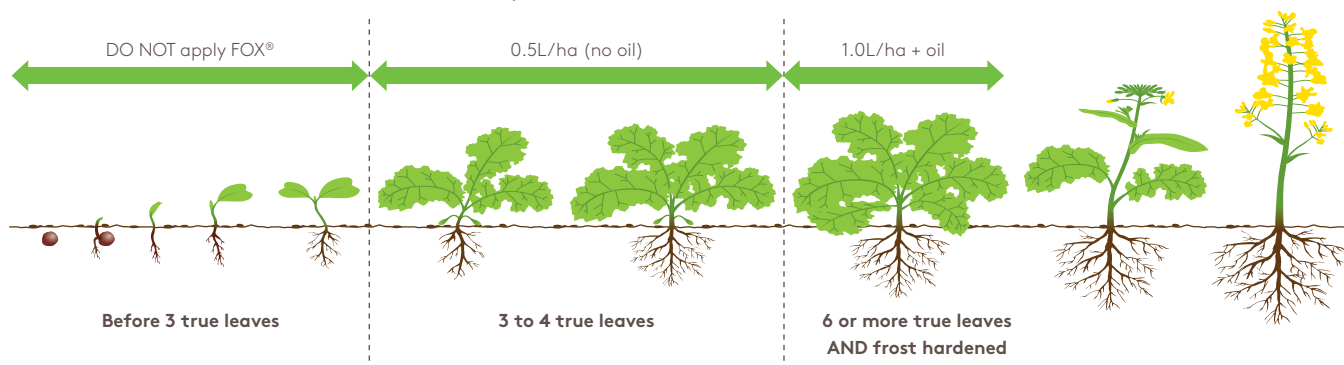

Water volume: 200-400L/ha

Spray quality: Medium

Aquatic buffer: 5 metres

Extension of Authorisation for Minor Use (EAMU)

20142318 for control of Geranium Species in OSR

Best results are achieved from a sequence approach:

0.5L/ha at 3 - 4 leaf stage, followed by 1.0L/ha + oil from 6 leaves (subject to crop being hardened off).

FOX® is a registered trademark of the ADAMA group. FOX® contains 480g/L (40.6% w/w) bifenox. Use plant protection products safely.
