

ADAMA

POWERTWIN®

SUGAR BEET

A residual and contact post-emergence herbicide based on phenmedipham and ethofumesate for the control of broad leaved weeds in sugar beet, fodder beet and mangel.

Key Benefits

- Combination of complementary active ingredients in an easy-to-use product
- The modern SC formulation based on micro-mill technology delivers even distribution and optimal absorption of the active ingredients by the weeds
- Excellent partner for metamiltrone (GOLTIX® and GOLTIX TITAN®)
- Excellent crop safety
- Wide range of adjuvant choice on label offering up to full rate product use even at later crop growth stages

Product Information

Active ingredients:
200g/L phenmedipham
200g/L ethofumesate

Formulation:
Suspension Concentrate

Pack size: 5 litres

Crop Information

Crops	Max individual dose (L/ha)	Max total dose (L/ha)	Latest time of application
Sugar beet, fodder beet and mangel	1.3	3.9*	Before crop leaves meet between the rows (BBCH 00-39)

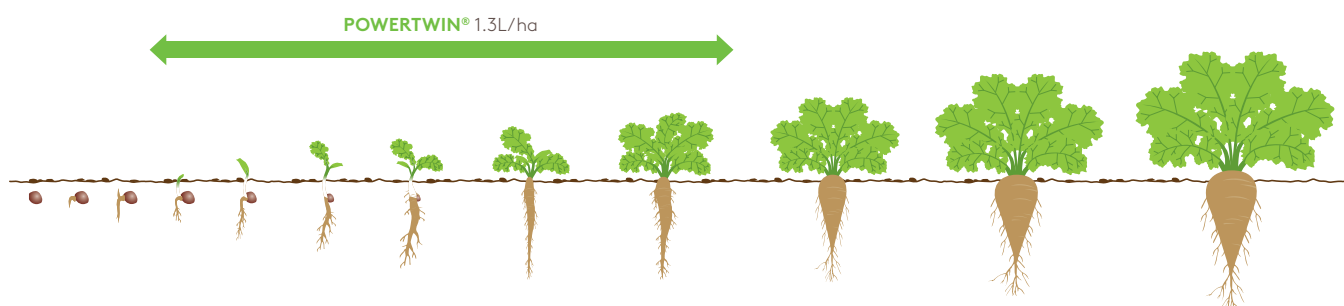

Application Information

Water volume: 80-200L/ha

Spray quality: Medium

Aquatic buffer: N/A

*The maximum total dose must not exceed 1.0kg ethofumesate per hectare in any three-year period.

POWERTWIN® is a registered trademark of the ADAMA group. POWERTWIN® contains 200g/L (17.9% w/w) phenmedipham and 200g/L (17.9% w/w) ethofumesate. Use plant protection products safely. Always read the label and product information before use.
