

ADAMA TRIBAL®

TRIBAL® is a unique residual, containing pendimethalin, diflufenican and chlorotoluron, providing excellent stand-alone annual meadow-grass control as well as broad-leaved weed activity in winter and spring cereals.

Key Benefits

- Excellent stand-alone annual meadow-grass and broad-leaved weed control
- When combined with prosulfocarb, TRIBAL® is an important part of Italian ryegrass and brome control programmes
- Flexible product label – can be used pre and post emergence in winter cereals and spring wheat and spring barley. Advantageous if pre emergence application is missed due to poor autumn weather conditions

Crop Information

Crops	Max individual dose (L/ha)	Number of applications	Latest timing
Winter wheat, winter barley, winter triticale & winter rye	2.0	1	Before pseudostem (leaf sheath) erect stage
Spring wheat, spring barley, spring rye and spring triticale	2.0	1	Before pseudostem (leaf sheath) erect stage

Product Information

Active ingredients:

250g/L chlorotoluron
40g/L diflufenican
300g/L pendimethalin

Formulation:

Suspension Concentrate

Pack size: 10 litres

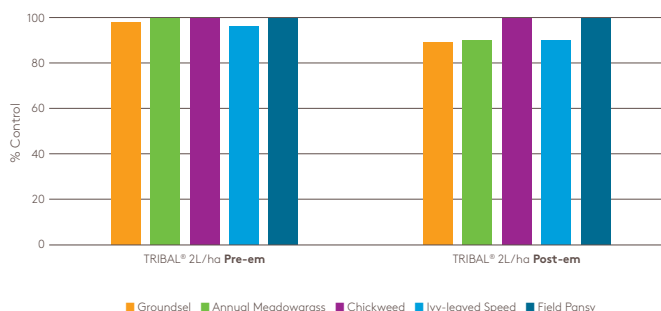

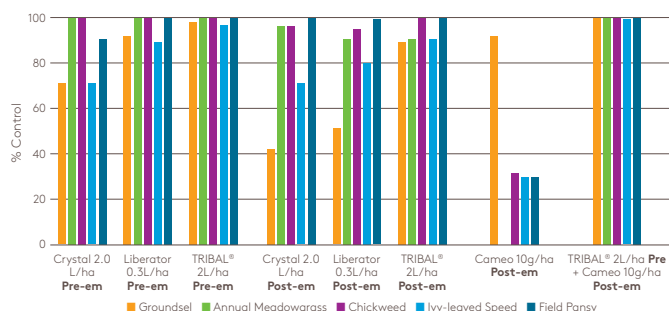

Application Information

Water volume: 150-300L/ha

Spray quality: Medium

Aquatic buffer: 6 metres

Delivering excellent performance pre-em and equal post-em in Lancashire

NO VARIETAL RESTRICTIONS – TRIBAL® can be applied pre- or post-emergence to all currently grown commercial varieties of winter and spring wheat, winter and spring barley, winter rye and winter triticale.

TRIBAL® is a registered trademark of the ADAMA group. TRIBAL® contains 250g/L (21.7% w/w) chlorotoluron, 40g/L (3.5% w/w) diflufenican and 300g/L (26.1% w/w) pendimethalin. Use plant protection products safely. Always read the label and product information before use.
