# CLEANCROP PROTOCOL®

## CEREALS

CLEANCROP PROTOCOL® is a unique, high performing prothioconazole, formulated using Asorbital formulation technology to ensure strong activity against key diseases in cereals.

### Key Benefits

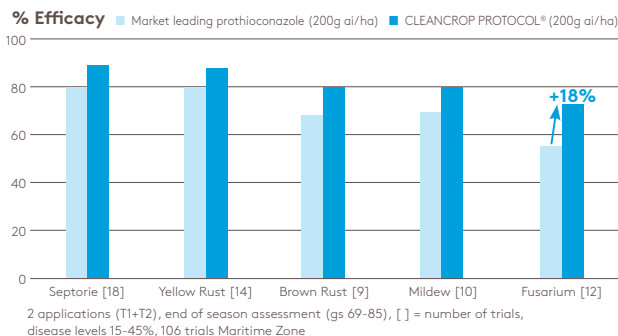

- CLEAN CROP PROTOCOL® is formulated using **Asorbital formulation** technology, including a built-in adjuvant and special solvent system.
- A fully optimised formulation improving uptake into the leaf, creating excellent systemic activity within the plant and increased rainfastness.
- Superior disease control compared to leading prothioconazole.
- Consistent and reliable under a range of conditions.

### Crop Information

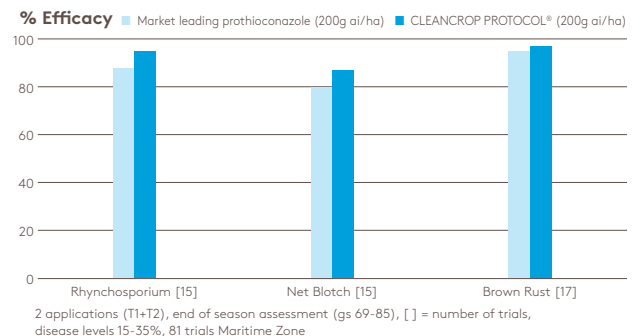

Crops	Max individual dose (L/ha)	Max total dose (L/ha)	Latest time of application
Winter and spring wheat, winter rye	0.8	2.4	Before grain milky ripe stage (GS 70)
Winter and spring barley, winter and spring oats	0.8	1.6	Before beginning of flowering (GS 61)

In extensive European trials, CLEAN CROP PROTOCOL® consistently showed a notable improvement in disease control under a range of conditions compared to the current market leading prothioconazole. Specifically, under Maritime conditions, trials have shown that CLEAN CROP PROTOCOL® is up to 18% more efficacious against fusarium than the current market leader.

### Improved disease control in wheat

### Improved disease control in barley

### Product Information

**Active ingredients:**

250g/L prothioconazole

**Formulation:**

Emulsifiable Concentrate

**Pack size:** 5 litres

### Application Information

**Water volume:** 100-300L/ha

**Spray quality:** Medium

**LERAP:** B

CLEANCROP PROTOCOL® is a registered trademark of the ADAMA group. CLEAN CROP PROTOCOL® contains 250g/L prothioconazole. Use plant protection products safely.
