

ADAMA

GOLTIX® 70SC

SUGAR BEET

A residual and contact broad spectrum herbicide based on metamitron for the control of broad leaved weeds.

Key Benefits

- Robust, reliable broad spectrum weed control providing the foundation to sugar beet programmes
- Enhanced residual activity and effective in varying environmental conditions, with excellent crop safety
- Mixing ethofumesate plus phenmedipham with GOLTIX® broadens the weed spectrum while offering both contact and residual activity
- Use GOLTIX® as the first herbicide application in Conviso Smart® programmes as part of herbicide resistance management and where control of Speedwell's is needed.

Crop Information

Crops	Max individual dose (L/ha)	Max total dose (L/ha)	Latest time of application
Sugar beet, Fodder beet, Red beet, Mangels	2.0	5.0	Before crop leaves meet between the rows

Product Information

Active ingredients:
700g/L metamitron

Formulation:
Suspension Concentrate

Pack size: 10 litres

Application Information

Water volume: 80-200L/ha

Spray quality: Pre-em:
Fine-Medium; Post-em: Fine

Aquatic buffer: N/A
