

ADAMA

# BREVIS®

BREVIS® differs from hormonal thinning agents as it temporarily inhibits photosynthesis without interacting with plant hormone regulation.

## Key Benefits

BREVIS® represents a major innovation in fruit thinning technology. The product is specially formulated for safe application on apples and pears shortly after flowering; a critical growth stage for yield development.

## Crop Information

Crops	Max individual dose (L/ha)	Max number of applications	Latest timing
Apples and pears	2.2	2	Apples and pears

## Product Information

**Active ingredients:**  
150g/L metamitron

**Formulation:**  
Soluble Granule

**Pack size:** 1kg

## Application Information

**Water volume:** 200-400L/ha

**Spray quality:** Medium

**Aquatic buffer:** n/a
