

POWERED BY

Desidro® Technology

Stops feeding faster

Improved attraction and palatability quickly halt feeding, resulting in a 90% reduction in damage within three days.

Prolonged efficacy

Superior mould resistance and pellet integrity thanks to Desidro® technology.

FERRABAIT®

It's all about the pellet

FERRABAIT® is a highly effective solution for protecting crops from slugs and snails.

A novel molluscicide product with a brand new active ingredient engineered with proprietary formulation and drying technologies.

FERRABAIT® stops feeding faster and offers prolonged efficacy due to its superior mould resistance and pellet integrity when compared with the market leading ferric phosphate products.

Application information

Dose rate/ha	Approx. no. pellets/m ²	Use at 5-8kg/ha
5kg	42	Increase rate under high infestation pressure and/or in high value crops where increasing baiting points are required
7kg	59	
8kg	67	

Product Information

Active ingredients:
10g/kg Feralla® (Elemental Iron)

Formulation: Bait (ready for use)

Pack size: 20kg

- **Rapid** stop feeding
- **Superior** efficacy
- **Sustainable** product
- **Prolonged retention** of pellet efficacy
- **Even distribution** of the pellets in the field

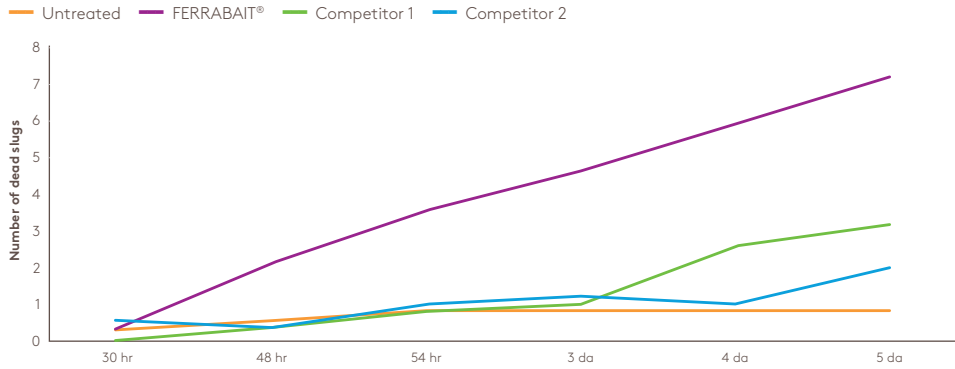

FERRABAIT®

POWERED BY
Desidro® Technology

Rapid Stop Feeding

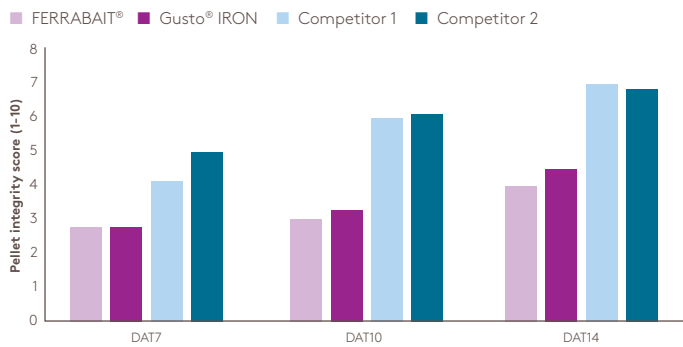

SPEED OF KILL – Number dead grey field slug following exposure to pellets @7 kg/ha

Retention of pellet efficacy:

Pellet integrity/stability

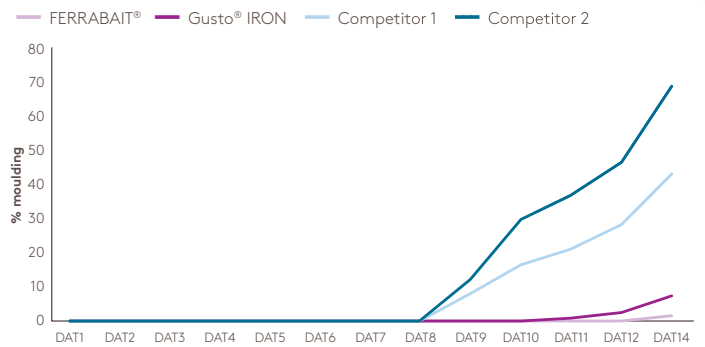

Score recorded following 10mm simulated rainfall over 10 days

Retention of pellet efficacy:

Pellet moulding

Score recorded following 10mm simulated rainfall over 10 days

Prolonged retention of efficacy

Freshly applied versus pre-weathered pellet.

Weathering regime: 4 mm simulated rainfall applied daily for a period of 10 days.
