

## Take control of your crop with Preface™ & Postscript™ in the FullPage™ Rice Cropping Solution

HERBICIDE	USE RATE
Preface	Use 4-to-6 fl oz per acre for post-emergence and residual control for post-emergence. Higher rates provide better residual & weed control.
Postscript	Use 5 fl oz per acre for post-emergence control.

### The most flexible system in herbicide-tolerant rice

☆ New for 2021!

CROP STAGES	OPTION 1	OPTION 2	OPTION 3	OPTION 4
	Standard for moderate infestations	For severe, susceptible red/weedy rice	When flooding is timely and less residual is needed	For well-managed fields and maximum rotational flexibility
Pre-emergence Herbicide	Vopak™ 3ME + saflufenacil			
1-2 Leaf Rice	Preface at 4-6 fl oz/A + Zurax™ L			Postscript at 5 fl oz/A + Zurax™ L
4-6 Leaf Rice	Preface at 4-6 fl oz/A		Postscript at 5 fl oz/A	
Scout fields in accordance with best management practices. Post-flood applications should be made if red rice was not completely controlled earlier.				
Post-flood	Postscript at 5 fl oz/A			
Preface and Postscript should be applied with a crop oil concentrate except as noted on the label.				

### PREFACE AND POSTSCRIPT HERBICIDE APPLICATION TIMING

← Scout fields, target small and actively growing weeds. Adjust timings if needed. →

PRE-EMERGENCE  
Vopak 3ME +  
saflufenacil

1-2 LEAF RICE  
Preface or Postscript  
+ Zurax L

4-5 LEAF RICE  
Preface or Postscript

POST-FLOOD  
Postscript if needed

# Stewardship

Stewardship is critical to all rice herbicide-tolerant systems to prevent the development of herbicide-resistant weedy rice. Growers using the FullPage™ Rice Cropping Solution are required to sign a stewardship agreement when purchasing FullPage seed. Stewardship requirements are based on common Best Management Practices for optimum weed control and resistance prevention.

**6-location Mean Yield**  
CF Hybrids and Inbreds

## Excellent Weed Control, Superior Crop Tolerance, Hybrid Yield Benefit, Increased Flexibility

### Only Preface™ and Postscript™ may be used on FullPage rice

- Rotate herbicide technologies and crops
- Make at least two applications of Preface or Postscript, or Preface followed by Postscript; consider a third application if needed
- Spray post-emergence herbicides on small, actively growing weeds
- Use best water management practices to activate herbicides and keep weeds susceptible
- Stewardship also includes a full program using additional standard rice herbicides
