

FUNGICIDE

VANTANA™

For growers who need a cost-effective chemistry to combat white mold/southern blight in peanuts & soybeans and late blight in potatoes.

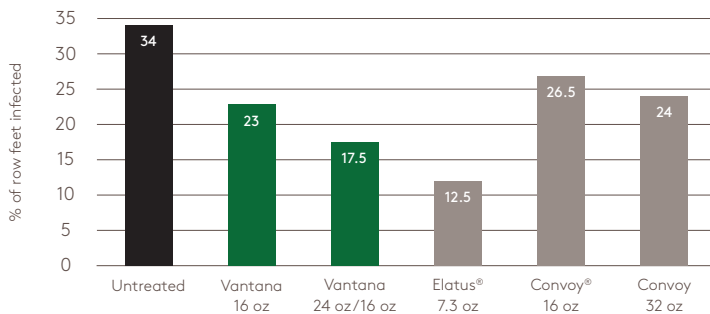

For growers seeking healthier crops & higher yield potential:

- Peanut: spray program with Bravo Weather Stik® for full spectrum disease control
- Potato: for control of late blight and white mold/southern blight
- Soybean: single spray for white mold/southern blight
- Specialty: control of alternaria and white mold/southern blight

White Mold/Southern Blight (*Sclerotium rolfsii*) Control

Dr. Tim Brenneman | University of Georgia | Tifton, GA | 2021

Treatment	Rate/A	DAP
1. Untreated	-	-
