

Rotation Options for Your Acreage

Providing Flexibility to Grow Profits

CROP ROTATIONS

INCLUDE SOYBEANS in the rotation for growers who choose a herbicide residual program.*

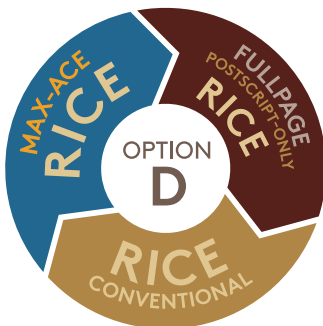

ROTATE CROPS based on what will maximize yield returns while minimizing herbicide resistance through different modes of action. Increase longevity of HT technology.

MAXIMIZE the number of crops per field over two years.

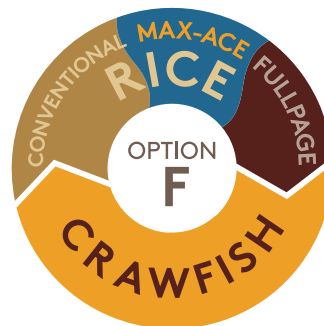

RICE SYSTEM ROTATIONS

ALTERNATE the Max-Ace with FullPage Rice Cropping Systems year-over-year for growers who want to stick with rice.*

POSTSCRIPT-ONLY helps diminish Preface carryover after at least 2 years removed from Preface and/or other imazethapyr applications. Annual rotation between FullPage & Max-Ace.

TAKE ADVANTAGE of seasonality and get two crops in one year.

**Observe rotational limitations for preceding year's herbicide plan.*

Always read and follow label directions. Preface, Postscript and FullScript are trademarks of an ADAMA group company. FullPage and Max-Ace are trademarks of RiceTec. ©2023 ADAMA.
