

FUNGICIDE

VANTANA™

For growers who need a resourceful chemistry to effectively combat plant diseases and support fungicide resistance management.

What is Vantana?

Vantana fungicide from ADAMA is an easy-to-use liquid formulation that provides multi-site mode of action that protects your yields and reduces the likelihood of developing resistance.

Benefits

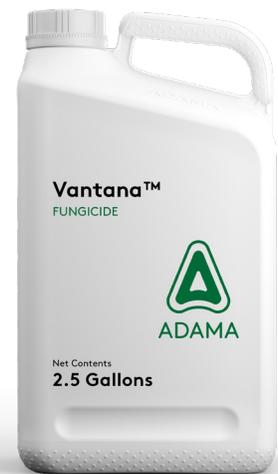

- Broad-spectrum Disease Protection
- Non-SDHI Fungicide for Resistance Management
- Tank-mix Compatible with Many Products
- Easy-to-use Liquid Formulation in Bulk Packaging Options

Resistance Management Guidelines

Vantana is a Group 29 fungicide and is an excellent disease control agent when used according to label directions for control of a broad spectrum of plant diseases. It is recommended for use as part of an Integrated Pest Management (IPM) program, however, continual or repeated use in the same field over successive years as the primary disease control method can lead to resistance to Group 29 fungicides.

Take the following steps to delay fungicide resistance:

- Rotate the use of Vantana or other Group 29 fungicides with different groups that control the same pathogens
- Use tank mixtures from a different group that are equally effective on the target pest when such use is permitted
- Use at least the minimum application rate as labeled by the manufacturer
- Monitor treated fungal populations for resistance development
- Adopt an integrated disease management program that includes scouting, uses historical information related to pesticide use, and crop rotation

Active Ingredient

Fluazinam

Formulation

Suspension Concentrate

Target Crops

Brassicas, Berries, Carrots, Cucurbits, Pulse Crops, Fruiting Vegetable, Lettuce, Onions, Peanuts, Potatoes, Soybeans

Target Pests

Botrytis Leaf Blight, Downy Mildew, Gray Mold, Late Blight, Sclerotinia Blight*, Sclerotinia Drop, Southern Blight, White Mold and More

Crop, Disease and Rate Information

The chart below provides an overview of the crops, diseases and rates that are recommended for Vantana.

****Please refer to the Vantana label for full directions/rates for use by specific crop groups.**

Crop	Disease(s) Treated	Rate/Acre**
Brassica Vegetables	Club Root	<ul style="list-style-type: none"> • Transplant: 6.45 fl oz / 100gals • Soil Incorporation: 41.6 fl oz / A
Cabbage	Downy Mildew, Alternaria Leaf Spot	<ul style="list-style-type: none"> • Foliar: 15.35 fl oz / A
Bushberries	Twin Blight, Fruit Rot, Anthracnose, Botrytis Fruit Rot	<ul style="list-style-type: none"> • 20 fl oz / A
Carrots	Southern Blight, Sclerotinia Rot, Alternaria Blight	<ul style="list-style-type: none"> • 16 fl oz / A
Cucurbit Vegetables	Phytophthora Blight, Downy Mildew, Alternaria Leaf Spot, Gummy Stem Blight	<ul style="list-style-type: none"> • 12 to 24 fl oz / A
Melons	Phytophthora Blight, Downy Mildew, Alternaria Leaf Spot, Gummy Stem Blight	<ul style="list-style-type: none"> • 12 to 24 fl oz / A
Pulse Crops	White Mold, Grey Mold	<ul style="list-style-type: none"> • 8 to 13.6 fl oz / A
Fruiting Vegetables	Phytophthora Blight	<ul style="list-style-type: none"> • 16 to 24 fl oz / A
Ginseng	Rhizoctonia Root Rot, Alternaria Blight, Botrytis Blight, White Mold	<ul style="list-style-type: none"> • 16 to 24 fl oz / A
Lettuce - Head & Leaf	Sclerotinia Drop	<ul style="list-style-type: none"> • 16 to 24 fl oz / A
Onion	Botrytis Leaf Blight, Botrytis Neck Rot, Downy Mildew, Purple Blotch	<ul style="list-style-type: none"> • 16 fl oz / A
Peanuts	Sclerotinia Blight*, Southern Blight	<ul style="list-style-type: none"> • 16 to 24 fl oz / A
Soybeans	White Mold	<ul style="list-style-type: none"> • 12 to 16 fl oz / A
Tuberous & Corm Vegetables	Late Blight, White Mold	<ul style="list-style-type: none"> • 5.5 to 8 fl oz / A
Potatoes	Suppression of Powdery Scab	<ul style="list-style-type: none"> • In Furrow: 24 to 48 fl oz / A
